

OPEN WATER

Our Open Water series allows skis with more volume to ski at a high level with superior balance and support. It's undeniable that surface area is your friend in skiing, it pops you out of the water with ease and it gives you the ability to float on top of the water. That surface area matched with our flat spine and the next evolution of Grip Rails has resulted in a ski that's even easier to ride and has less drag. The Sessions will change the way you view a sheet of glass, go rip it up!

THE SESSION

SHAPE

STRAIGHT LINES

The straight lines built into the Open Water series allow the ski to carve more continuously and let the ski roll on edge more naturally. This combined with our updated grip rails make for the most effortless and smooth lines you've ever dreamed of skiing.

FLAT SPOT

Open Water skis sport an oversized flat spot which allow the skis to auto-level. Skiers of any ability level can hop on a Session and feel instantly at home due to its balance on the water.

LEVEL SPINE

Open Water skis have a flat spine directly down the center of the ski. This allows water to flow cleanly down the center, reducing drag and making it possible to make endless turns without tiring out.

GRIP RAILS 2.0

The evolution of our grip rails was aimed to allow the ski to engage much easier. These angled rails also force water to the center of the ski increasing lift and decreasing drag. What you'll feel is effortless flow and ease of turning.

MEN'S

SESSION

The Session was built with stability and ease in mind. With more surface area than we've ever created, getting out of the water is a breeze and once you're up, you'll feel like you're floating with the level spine and grip rails reducing drag. Our All-Terrain construction makes crossing wakes and rougher water simple and smooth. Like all Radar Skis the Session is built with 100% carbon laminates.

Terrain
OPEN WATER

Speed Range
20-30 MPH | 34-49 KPH

Features
ALL-TERRAIN CORE
Most forgiving construction.

100% CARBON FIBER
Consistent flex every time.

GRIP RAILS 2.0
Allowing your ski to engage with ease.

SIZE (IN)	65	67	69	71
WEIGHT (LBS)	Up To 160	130-190	175-230	220+
WEIGHT (KG)	Up To 73	59-86	79-104	100+
SURFACE AREA (SQ IN)	416.13	442.13	468.92	482.51
MAX WIDTH (IN)	7.76	8.00	8.24	8.24

WOMEN'S

SESSION

If you want a ski that makes deep water starts a breeze, is balanced and stable when you're cruising, and progressively rolls on edge for continuous turns all the way down the lake, then you need a Session. This ski is designed to ride between 20 and 30 MPH in the open water and is guaranteed to leave you with a smile on your face!
