CONSTRUCTION
 KOAL CLASSIC

The building block to a surf constructed
 surfer wrapped in wood laminates for
 improved dampening.

The timeless funboard. A versatile shape that withstands time in the
 progression of surfer designs and constructions. The swallowtail Fish
 profile allows it ride loose, breaking free on the top of the lip, yet still
 responsive for a bottom turn drive that will get you there on time. You'll get
 recreational level ease and stability from this smooth ride – a perfect board
 for us inlanders looking for wake slashing versatility. A ride for all styles
 and abilities.
